

**White Hills Botanic Gardens
Masterplan and Wayfinding Signage Package**

We at the City of Greater Bendigo have engaged Arterial to assist us with Interpretation Planning, Graphic Design and Signage design for the Bendigo Botanic Gardens Master Plan which is currently underway.

Arterial have been enthusiastic and professional in their approach and in many cases have exceeded our expectations in quality and consideration of the product. Their skills and appreciation of the particular nature of a Botanic Garden has been evident in the work that they have carried out so far. In Bendigo we are aware of the Volcano Project at the Royal Melbourne Botanic Gardens and have no hesitation in recommending Arterial for such a project. Their appreciation of sensitivity required and the mix of skill that include design, graphics and visualisations can only add value to such an important project.
